OVERSEEDING

Speedseed

WB

The Speedseed WB is the ideal machine to carry out all your overseeding works on fine turf areas, and is fitted with a long life Briggs Vanguard 6.5 hp engine and hydrostatic transmission, which produces an infinite range of forward and reverse speeds.

FEATURE	BENEFIT
Easy-to-Reach Operator Controls	Simple operation
Spike Roller	Thousands of holes
Rear Mounted Brush	Groomed surface
Accurate Seeding System	Eliminated waste

OVERSEEDING

Speedseed **WB**

SPECIFICATIONS	DESCRIPTION
Engine	6.5 hp (4.85 kw)
Working Width	24" (60 cm)
Weight	463 lbs (210 kg)
Hopper Capacity	1 cu. yd. (75 L)
Seed Rates	Variable
Shipping Dimensions (L x W x H)	59" x 43" x 35" (150 cm x 110 cm x 90 cm)
Optional	Extra weights (to help with penetration in difficult conditions)

The ideal machine for overseeding

Operating controls

Rear mounted brush

All operating controls are mounted on the handlebars for easy use, and maneuverability is made easy by the side wheels, which transfer the machine's weight when turning. The grass seed is spread accurately the full 24-inch width of the spiked area, by the precision twin matched stainless steel aperture sections. A cam gauge and lever control the seeding rates. A rear mounted brush sweeps the seed into the thousands of created holes—leaving a groomed finish.
